

HOW WE MAKE SUBSTRATES

PRODUCTION PROCESS

1

PEAT FIELD HARVESTING

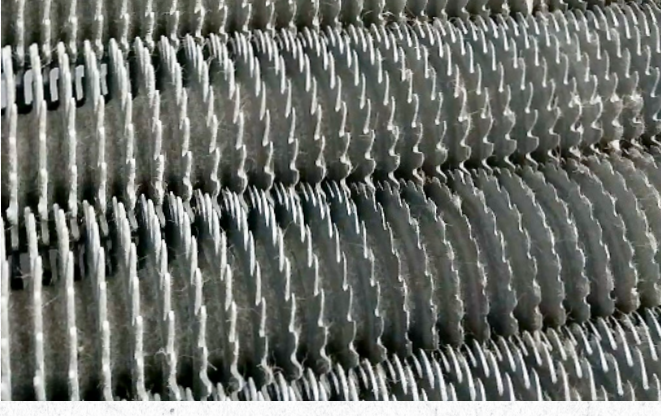

There are two different methods of peat field harvesting block cutting and vacuum harvesting.

2

PEAT MILLING AND SCREENING

screening grades are :
0-5, 5-12, 12-25, 25-45, 0-25 mm

3

MIXING DIFFERENT PEAT TYPES AND FRACTIONS

From different components like:
frozen through black peat,
milled white peat, brown peat,
block peat.

4

ADDING DIFFERENT COMPONENTS

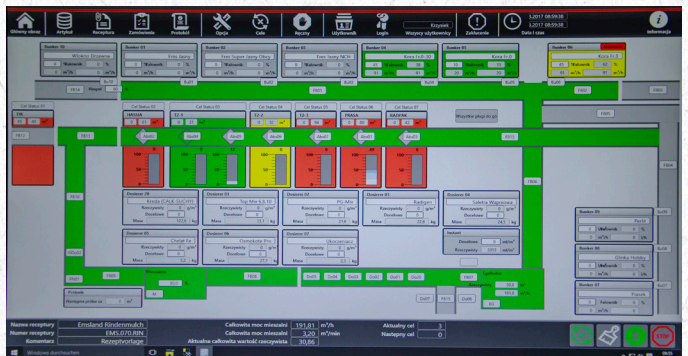

Like perlite, clay, wood fibres, etc.

5

FERTILIZER STATION

adding lime and fertilizer

6

PACKING FINISHED PRODUCT

in bags, bales or big bales

7

QUALITY CONTROL

Internal and external control of finished product.

THE WHOLE PROCESS IS ISO 9001 CERTIFIED.
